EDUCATION

City University of New York, Lehman College

Bronx, NY

Bachelor of Science in Computer Science, Minor in French GPA: 3.88

Expected May 2026

Honors/Awards: Lehman College Foundation Scholarship, Phi Beta Kappa

Relevant Coursework: Data Structures and Algorithms, Full Stack Web Development, Artificial Intelligence

Affiliations: Girls Who Code, Rewriting the Code, ColorStack, Management Leadership for Tomorrow, CUNY Tech Prep

SKILLS

Languages: JavaScript, HTML, CSS, Java, Python

Technologies: React.js, Next.js, Node.js, Express, Tailwind CSS, PostgreSQL

Developer Tools: Eclipse, Visual Studio Code, Git, Postman, Jira

Certifications: Girls Who Code Beginner HTML & CSS, Girls Who Code Beginner JavaScript, Girls Who Code Web Design for Social Good, freeCodeCamp Responsive Web Design, freeCodeCamp Front End Development Libraries, Postman API Fundamentals Student Expert, CodePath Intermediate & Advanced Web Development

PROFESSIONAL EXPERIENCE

Liberty Mutual Insurance

Boston, MA

Software Engineer Intern

Jun 2025 - Aug 2025

- Architected a React chatbot UI embedded via iframe in Confluence to enable cross-organizational teams to ask natural language questions about internal documentation, reducing time spent manually searching wikis.
- Conducted a version analysis of Retrieval-Augmented Generation (RAG) and 2 embedding models, identifying 4 key improvements to enhance chatbot answer quality.
- Produced comprehensive technical documentation spanning API specifications and Confluence integration guides, establishing a knowledge foundation that ensures long-term project maintainability.

Brooklyn Navy Yard

Brooklyn, NY

Software Engineer Intern

Jun 2024 – Aug 2024

- Developed an opt-in text notification feature in the ID portal using React and Django, enabling real-time photo ID appointment updates and significantly improving communication efficiency with the security department.
- Leveraged Mailgun API to automate text opt-in form distribution, saving ~5 hours in manual email sending.
- Revamped technical documentation for ID portal development environment setup, reducing onboarding time for new team members by 25% and increasing productivity.

BlackFacts.com

Brooklyn, NY

Front End Developer Intern

Jul 2023 – Aug 2023

- Created a responsive WordPress site for a homeschooling product, increasing user engagement with Black history content for homeschool students.
- Collaborated with a 12-person team to document 190+ racially motivated incidents in Google Sheets, helping establish a comprehensive research database that supports advocacy initiatives nationwide.
- Designed a user-friendly wireframe for a website that visually displays the data on racially motivated incidents, ensuring an accessible and user-friendly experience for researchers and advocates.

PROJECTS

Soccer League Tracker (React.js, Node.js, PostgreSQL) | github.com/arelymartinez16/SoccerLeagueTracker

- Engineered a full stack application to efficiently track real-time data for 200+ soccer leagues around the world.
- Integrated live game highlights, real-time scores, and detailed standings, enabling users to stay updated on global leagues and easily access curated match information.
- Implemented a JWT-based authentication system using PostgreSQL to ensure seamless user access within the app.
- Utilized bcrypt.js for secure password hashing in user accounts, strengthening overall system security and significantly reducing vulnerability to potential breaches.

Oyster (Remix/React, Node.js, Tailwind, PostgreSQL) | github.com/colorstackorg/oyster

- Built a file editing feature for resource attachments, increasing user satisfaction by 90% through seamless viewing and replacement of existing uploads.
- Optimized applicant evaluation process by implementing a dropdown menu and automated email system, resulting in a 75% decrease in support inquiries.
- Engaged in code reviews with the ColorStack engineers and pair programming sessions with a Bloomberg engineer and delivering two production-ready features that improved code quality and maintainability.
